**Subject:** Weekly Watershed Update

Greetings everyone,

Conditions for fish remain excellent with heavy rain predicted in coming days, for the rest of us, put your umbrella by the door.

Lake level is currently below rule curve level but with rainfall predicted for this week, lake level and river flow will rise.

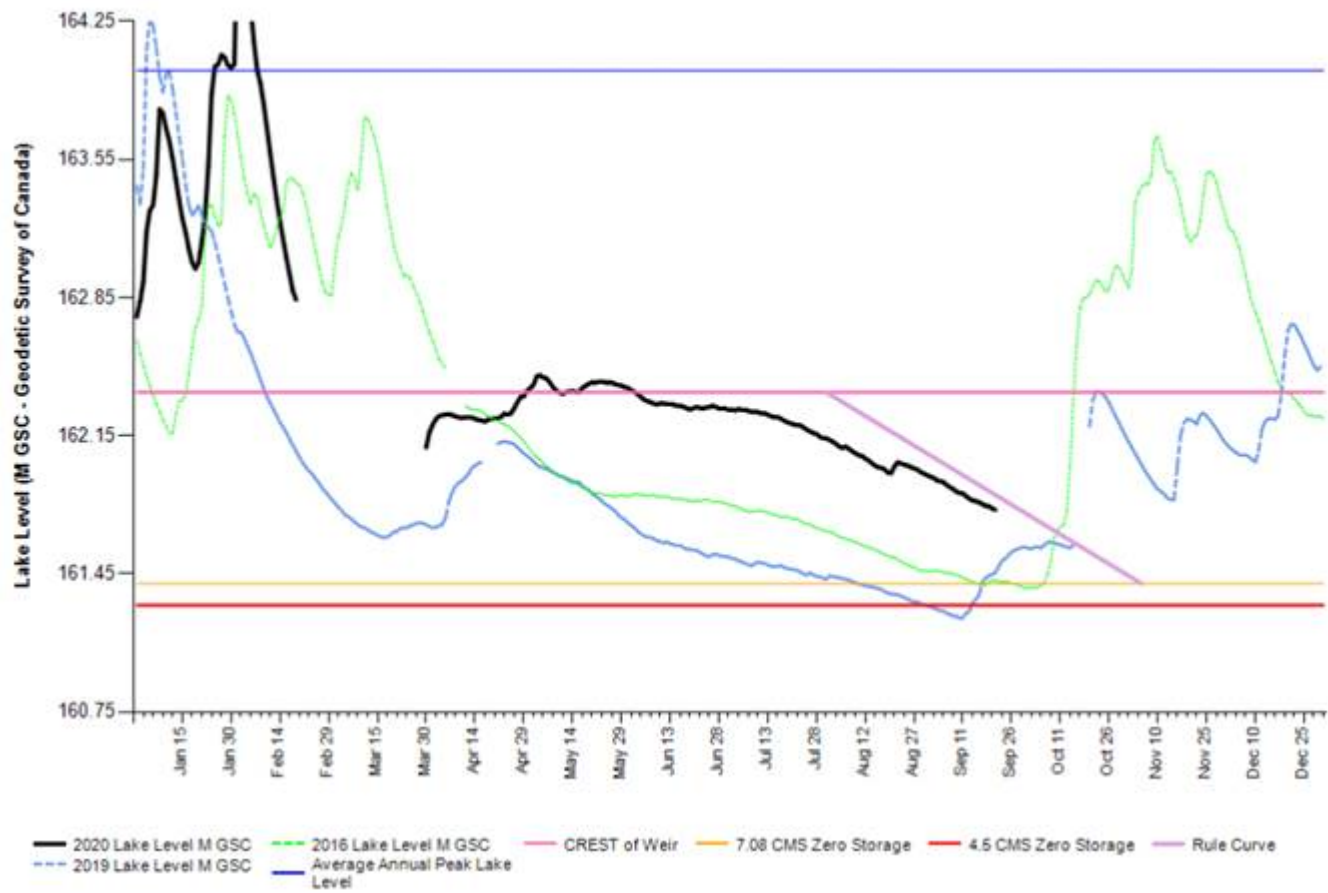

It is possibly that enough rainfall will arrive in coming 5 days to result in the weir coming off control.

If lake level rises to above the indicated rule curve level, Water License specifies to no longer control lake level and to come off control.

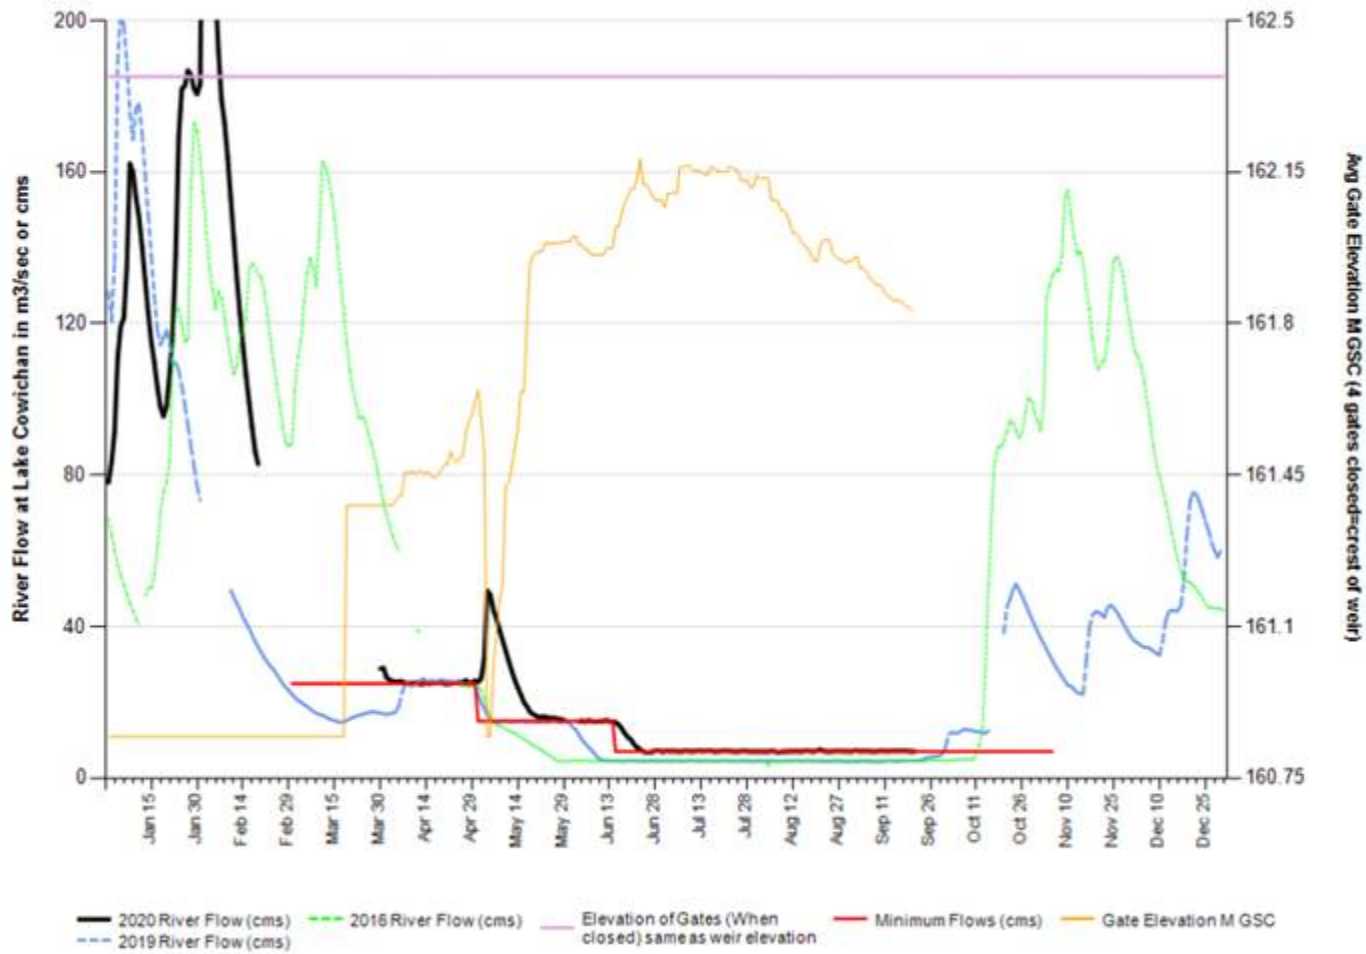

With the dry season mostly behind us, flow adjustments now tend to be toward higher flows as soon as they can be afforded.

Regards,  
Brian Houle
