Subject: Lake and River Update: Weir is now on control

Good day everyone,

The 2021 weir control season has begun.

Boat lock gates were lowered on Thursday last week.

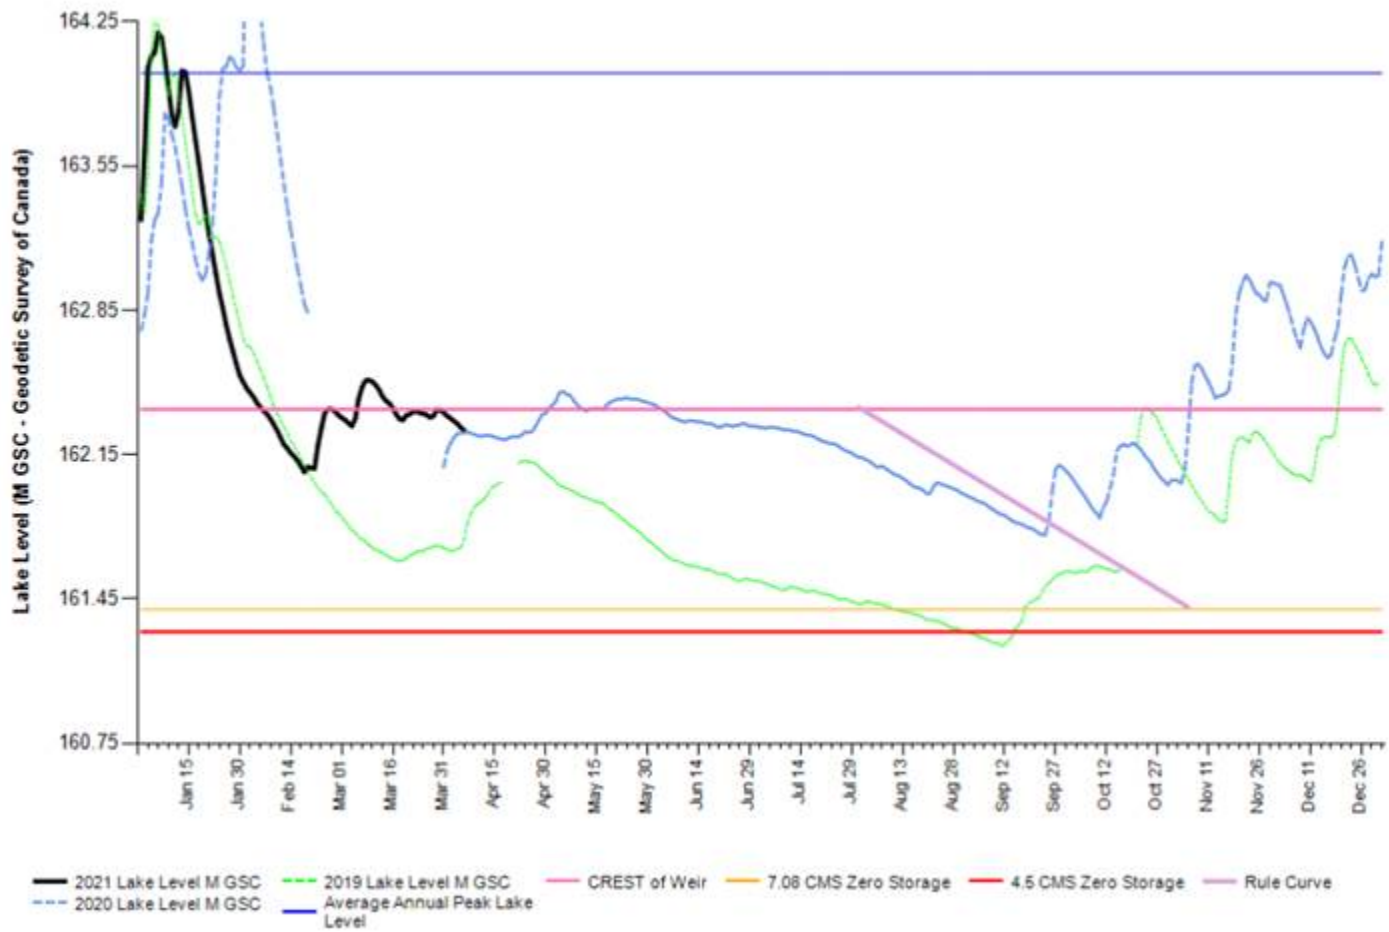

The predicted rainfall from this past weekend did not arrive but more rainfall is predicted to arrive in coming days.

I am expecting lake level will return to full supply in coming days and in response to gate adjustments to lower river flow and from more rainfall refilling the lake.

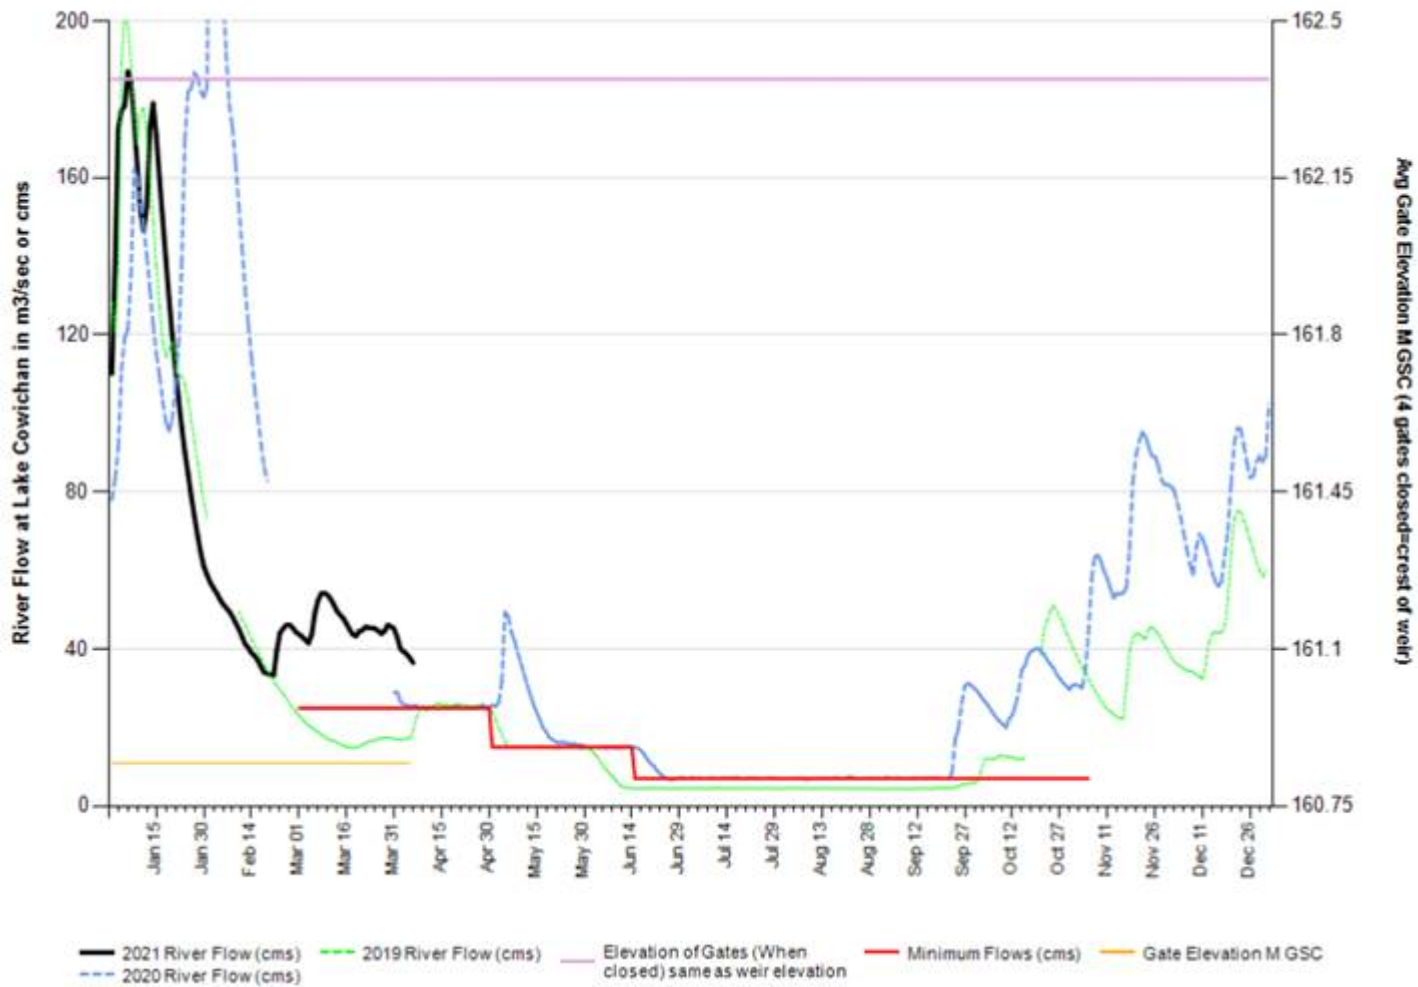

I have included all the trends in this email and overall, 2021 is showing to be a wetter year and should see higher ideal flows in river like we experienced last year.

Regards,
Brian Houle
