

ENVIRONMENTAL POLICY

Meadow Lake Mechanical Pulp Inc. is the world's first successful zero-liquid effluent pulp mill. We produce chlorine-free, high-yield Bleached Chemi-Thermal Mechanical Pulp (BCTMP). Our goal is to enhance our position as an internationally competitive and sustainable business while minimizing environmental impacts.

We are committed to:

- Meeting the requirements of all applicable environmental laws, regulations, standards, and voluntary programs.
- Continuously improving our management system to enhance our environmental performance by identifying environmental aspects and reducing impacts with respect to land, air and water.
- Protecting the environment through the use of environmental protection and pollution prevention technologies, sustainable waste and resource management, energy reduction, and spill response initiatives.
- Setting measurable objectives and maintaining reliable processes for tracking and enhancing our environmental performance.
- Maintaining open communication with our employees, the public, our customers, and regulators.

We believe that protecting and sustaining our environment for future generations is the responsibility of every person and an integral part of the way we conduct our business.

Simon Imray
