**Subject:** Watershed update; July 18, 2022

Good morning everyone,

Conditions remain excellent for fish.

For the rest of us, not so much.

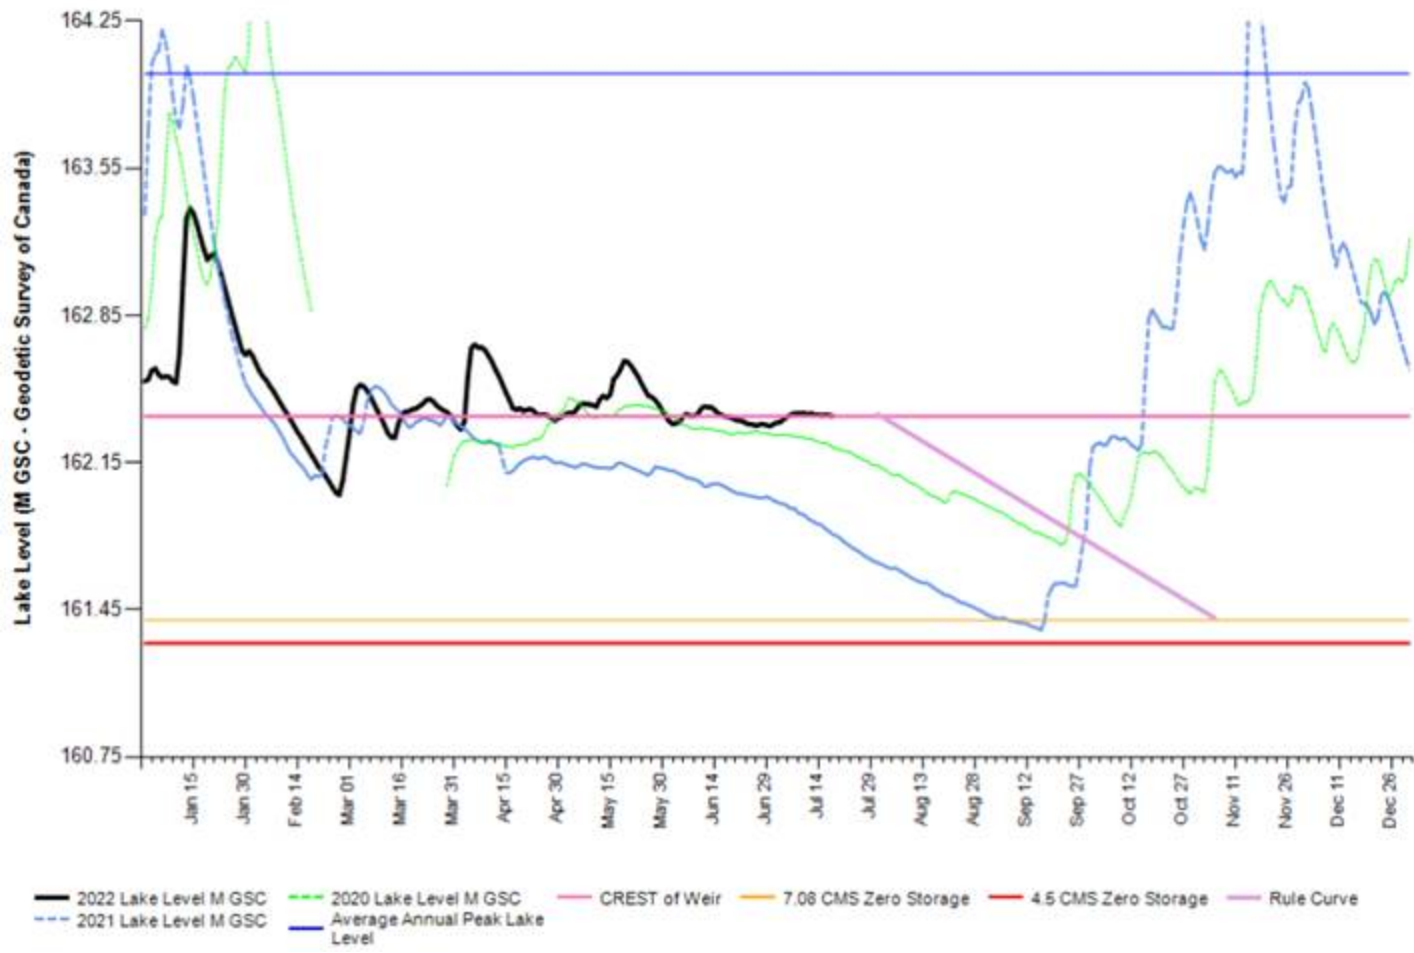

Lake remains at 100% full and river flow from lake remains elevated from summer base flow.

Snow pack now shows fully melted and while there is still snow at elevations higher than the snow pillow, most of snow pack is now melted.

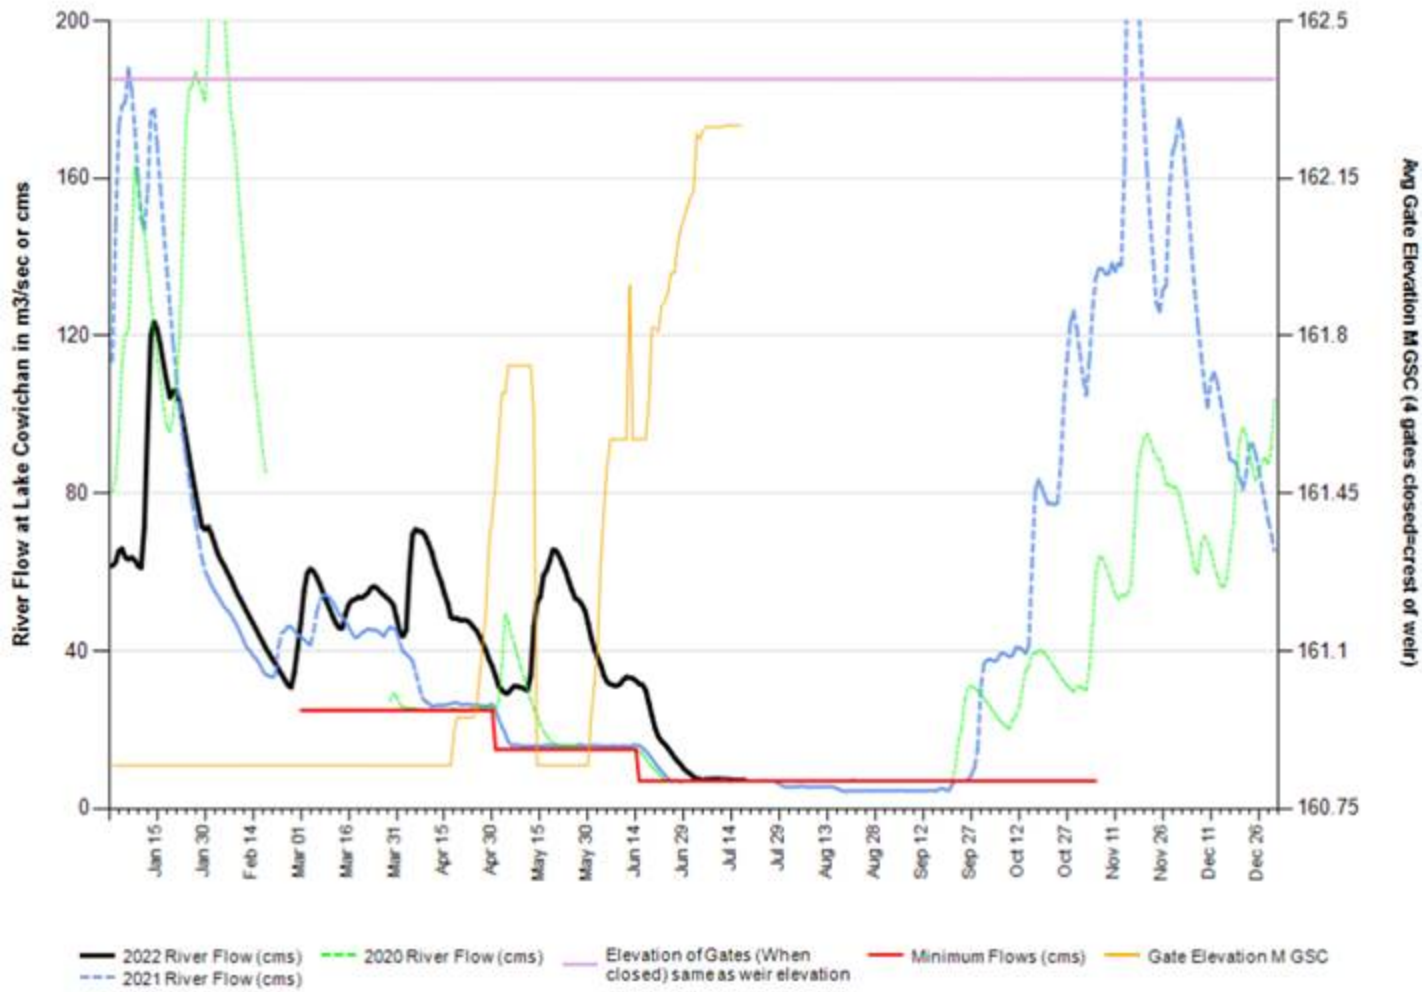

Lake should now begin steady decline even if this cloudy wet weather remains with us through entire summer period, given snow pack is now done.

Regards,
