Subject: Watershed Update: June 13, 2022

Good day everyone,

The sun is shining and finally a 7 day forecast that does not include significant rainfall.

Unfortunately, still clouds every day and some rain predicted most days.

Lake level continues to hold at 100% full and river flow from lake remains elevated at 33 cms compared to ideal flow at this time of year of 15 cms.

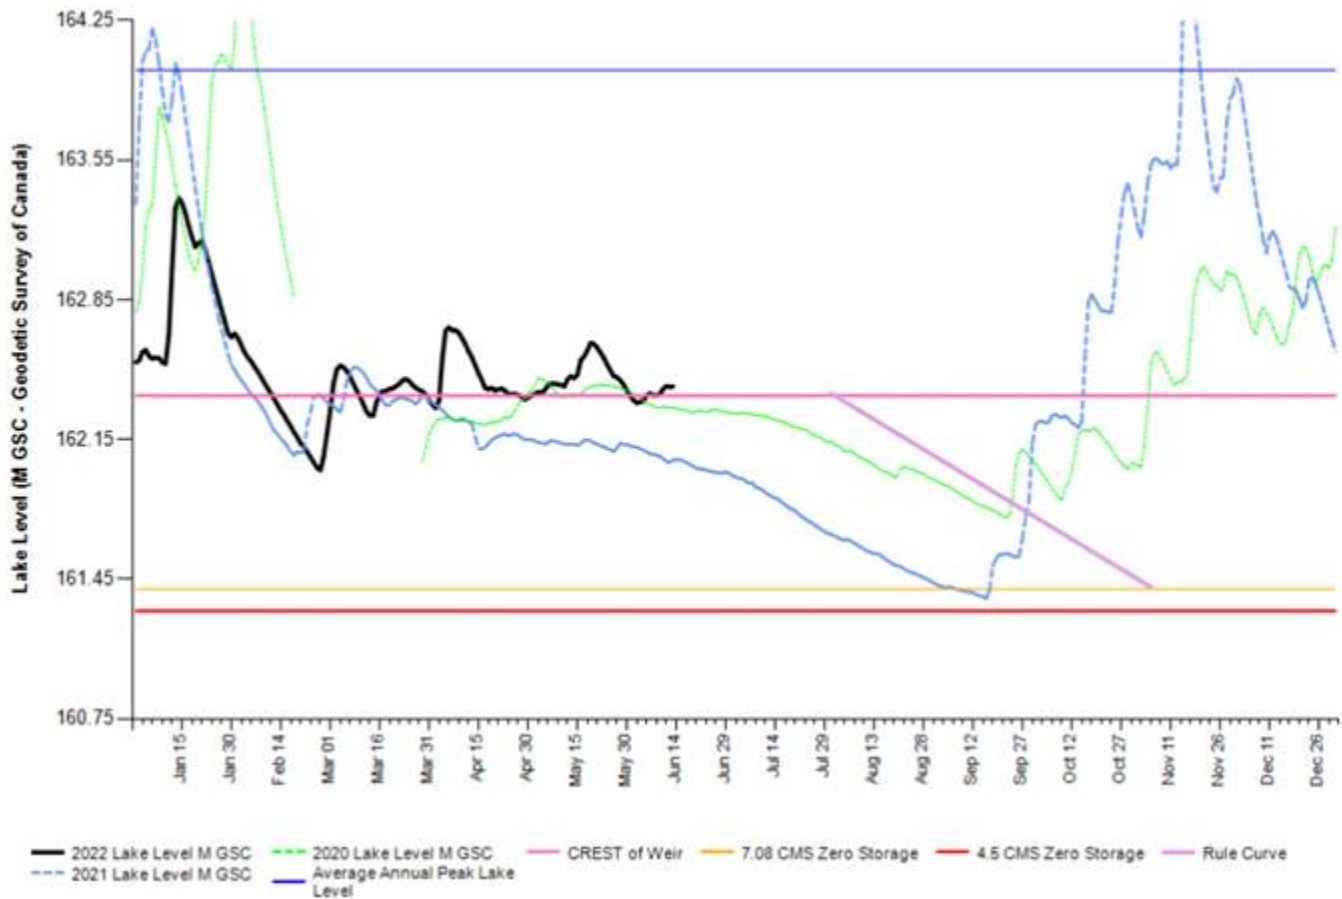

Beginning on Wednesday the water license authorizes the mill be operate with a flow from lake of 7 cms.

It will be a few extra weeks of elevated river flows given how high the lake is currently and that most of the snow pack remains to melt.

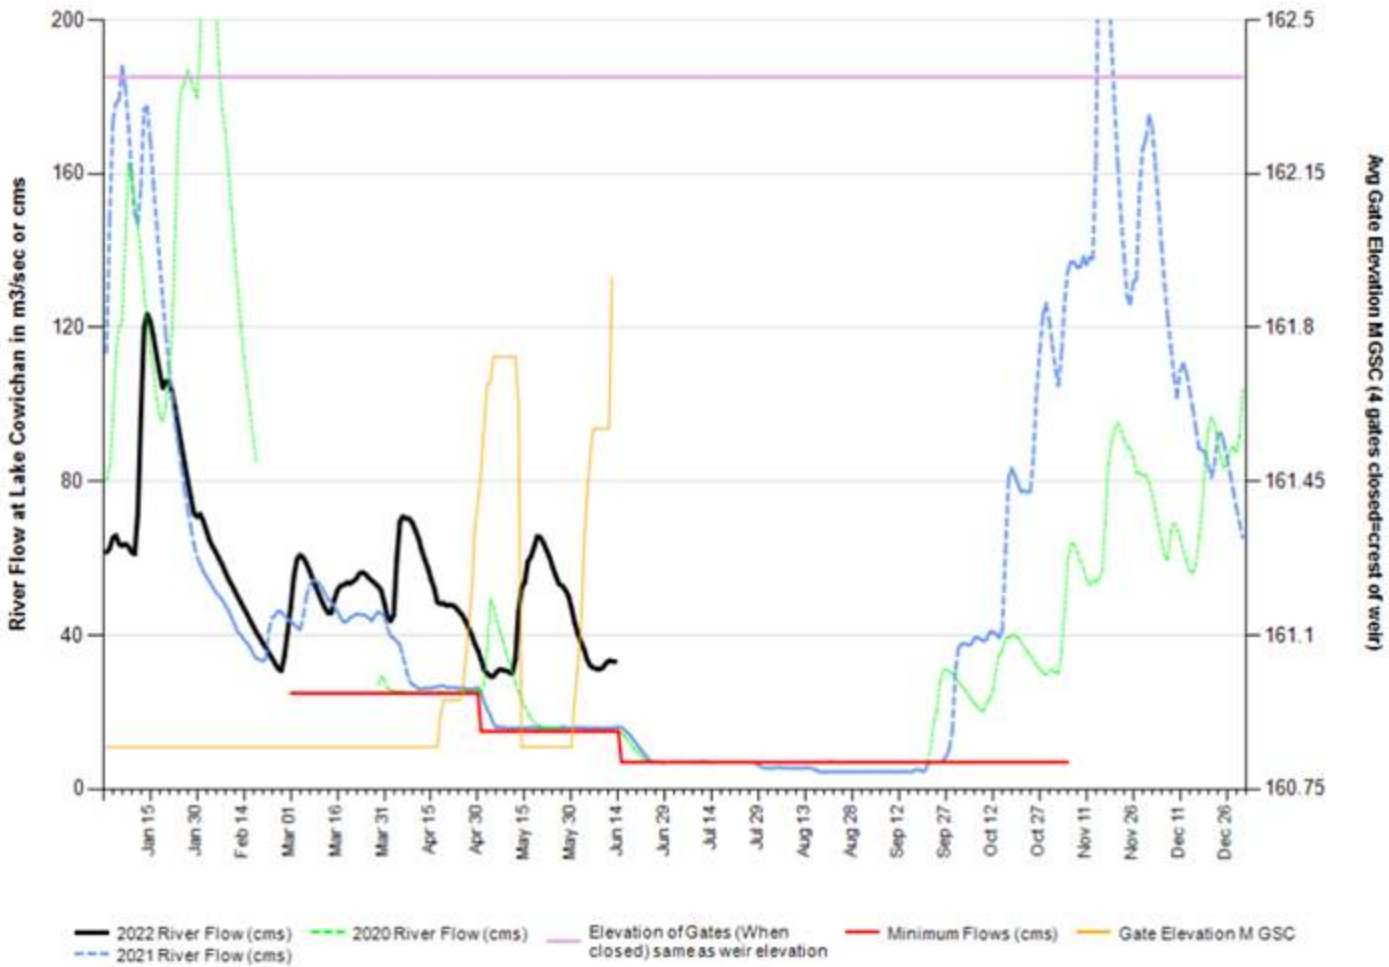

All the best,

Brian Houle
