Subject: Watershed Update: August 13, 2024

Good morning,

No concerns in watershed at this time, with lake level high enough to support full base flow well into October. While it is still possible that a flow below 7 cms could be needed this fall, no concern at this time. Projections from both key charts below show lake level can support 7 cms out to about October 17. Official end of dry season is November 5, but we normally have substantial rainfall well before official end of dry season.

Regards
Brian
