Subject: Watershed Update: February 13

Good day,

Conditions continue to be concerning with lack of snow pack accumulation on west coast.

I have included both Nanaimo and Cowichan watershed snow packs and both show the same message, very little snow in the mountains

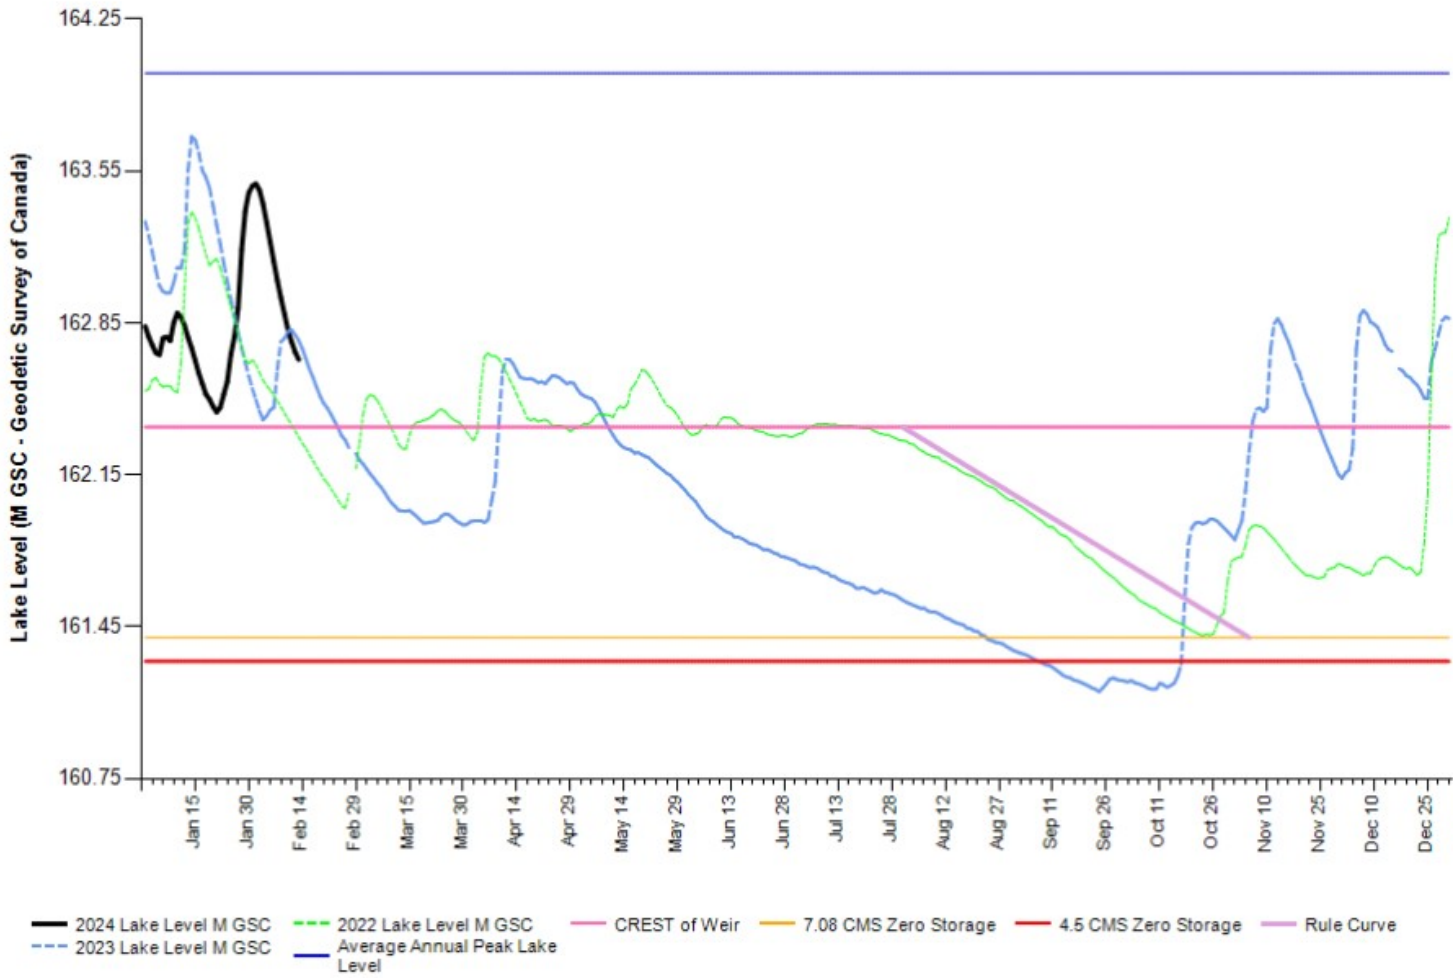

While we still have time to accumulate snow pack, 2024 is setting up to be another very challenging water year, like 2023.

Fortunately, at this time, the lake level is well above full supply and at the same lake level as last year on this day.

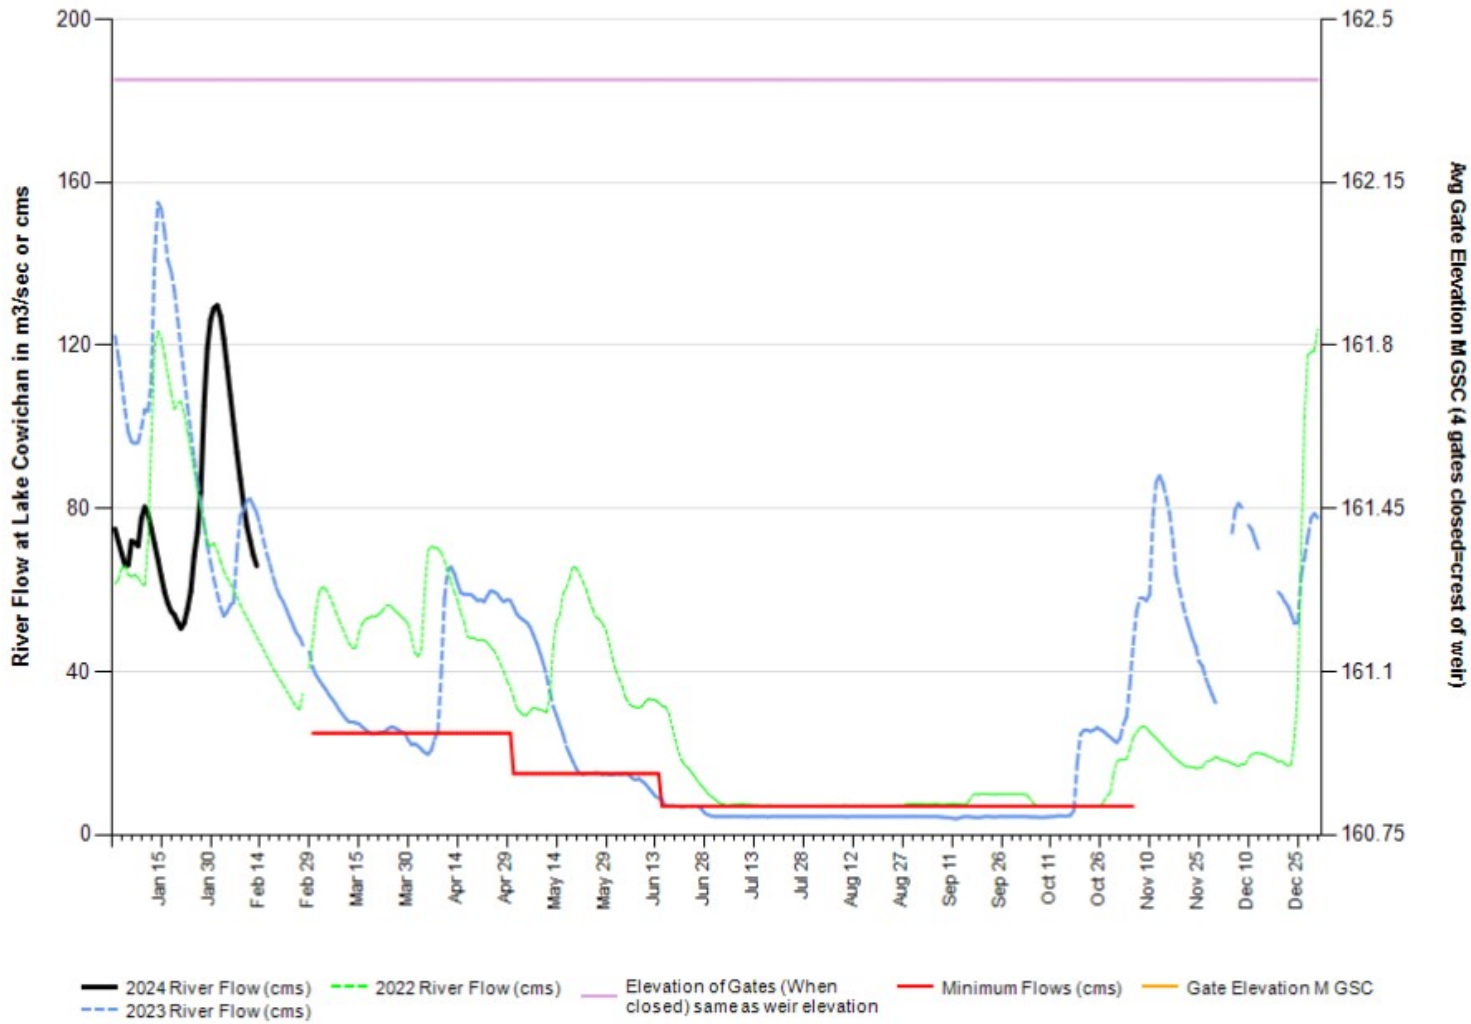

If weather stays on dry side in coming weeks, lake level will be at full supply on about Feb 24th, like it was in 2023.

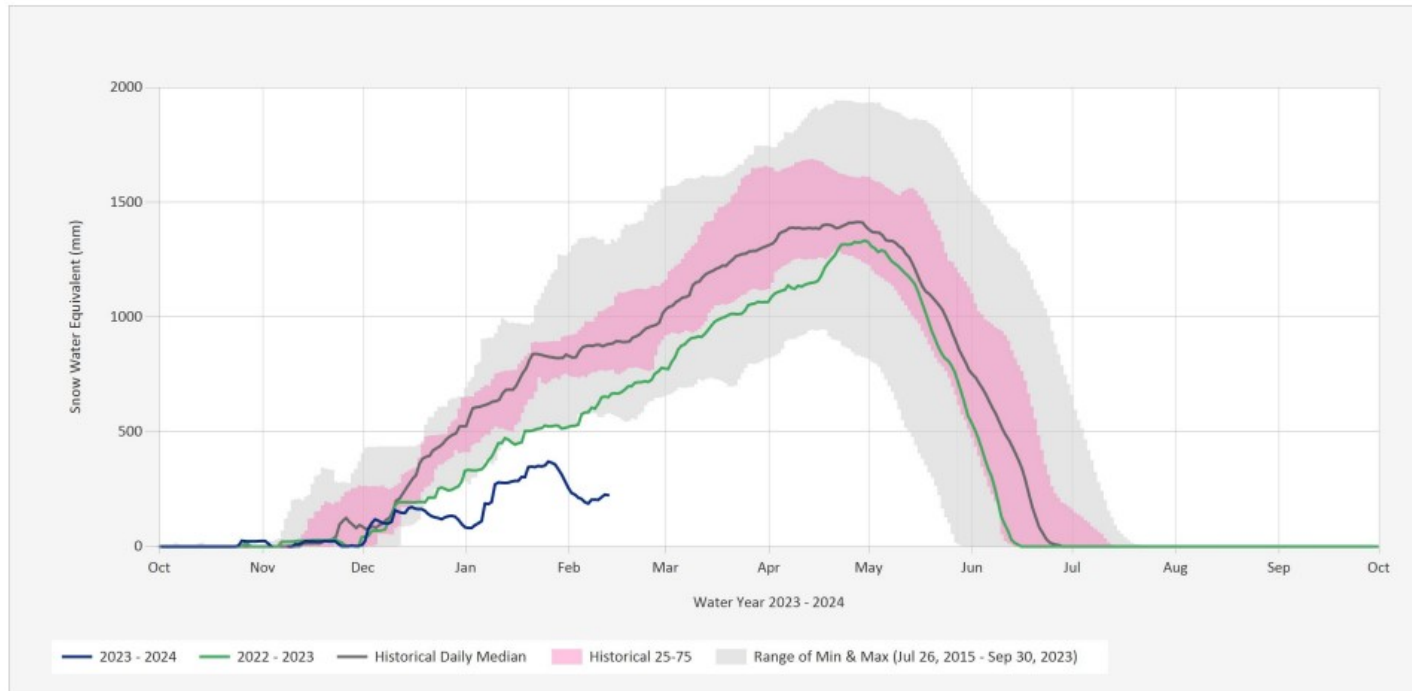

Regards,
Brian Houle

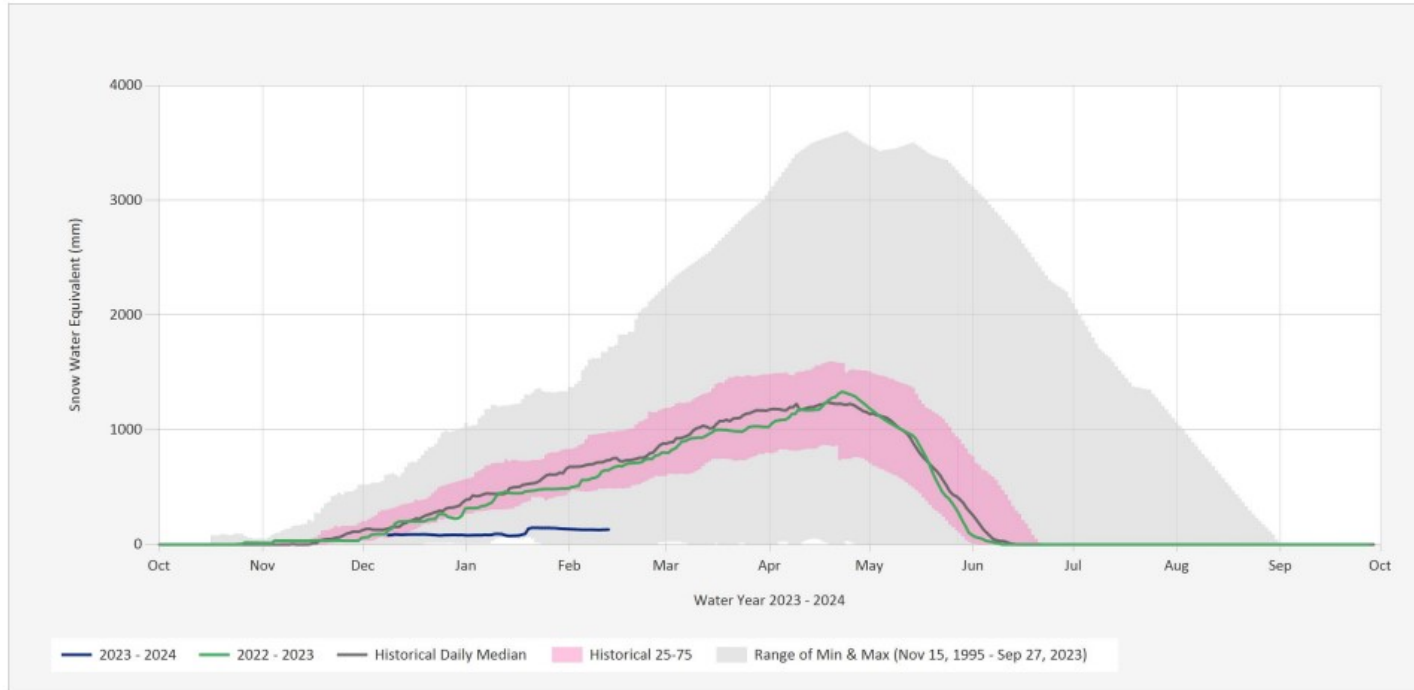

2024 Cowichan Lake Level - 2024 (Black) & 2023 (Blue) & 2022 (Green)

2024 Cowichan River Flow - 2024 (Black) & 2023 (Blue) & 2022 (Green)
