EXCELLENCE**

12 AMAZING FACTS

Every day, incredible stories of skill and science take place at our Paper Excellence mills around the world. These facts reflect the extraordinary technologies that we utilize to make our products and the amazing talents that our employees demonstrate in maintaining and operating our facilities to proudly manufacture our pulps and papers.

\$1,500
per tonne

Every tonne of pulp and paper that we produce on average injects about \$1,500 into the economy creating direct and indirect jobs, paying for our supply chain ingredients, supporting local businesses, creating demand at restaurants and paying local taxes.

Since 1990, our company and our facilities have eliminated almost 2 million tonnes of greenhouse gases through modernization projects and closure of old, inefficient mills; equivalent to taking about 500,000 cars permanently off the road.

500,000
Cars Gone

110,000

In 2018, the company purchased over 110,000 pairs of gloves (of numerous varieties) to help protect employees' hands.

5.9km
High

Our paper must be hung from over 5.9 km high to break under its own weight. Low carbon steel has a breaking length of only about 4.7 km.

Our Meadow Lake mill compresses each of its 440 lb pulp bales with the pressure equivalent to 214 school buses stacked on top of each other.

214
School Buses

6 Million
Seedlings

Every year, we grow 6 million seedlings in our Nova Scotian nursery for replanting of 7,500 acres of Canadian forests.

We self-generate enough green electricity to support consumption from 200,000 typical North American family homes.

Homes

12 AMAZING FACTS

82%

Our energy basket is made up of 82% renewable sources like biomass fuel and hydroelectric power. On average, US renewable energy makes up only 17% of the grid.

Our largest boiler has almost 35 km of tubing that converts water to steam for our pulping, drying and electricity generation processes.

35 km

4 mm
Long

The average length pulp fibre within our products is only about 4 mm long but creates incredible finished products like tissue, towel, surgical gowns, paper, and packaging; and it is one of only a few products that come from fully renewable resources (forests) that are 100% recyclable.

Our oldest mill, which is one of the most modern in British Columbia today, was established in 1909 as the first of its kind on the coast.

115
Years

34
Scholarships

Every year, we award 34 scholarships to deserving high school graduating students working towards further education and a better opportunity and life.

Our employees are highly diverse and talented coming from unique backgrounds like millwrights, electricians, welders, foresters, engineers, IT experts, accountants, operations experts, biologists and firefighters. What unifies them is the relentless drive to improve our performance and better what we did yesterday.
